

Dual open-access strategy

Gold: Publish your articles in an open-access journal whenever a suitable one exists today (currently 1000, <5%)

and

Green: Publish the rest of your articles in the toll-access journal of your choice (currently 23,000, >95%) and self-archive them in your institutional open-access eprint archives.

The two open-access strategies: **Gold** and **Green**

Open-Access Publishing (OAPub) (BOAI-2)

1. Create or Convert 23,000 open-access journals (1000 exist currently)
2. Find funding support for open-access publication costs (\$500-\$1500+)
3. Persuade the authors of the annual 2,500,000 articles to publish in new open-access journals instead of the existing toll-access journals

Open-Access Self-Archiving (OAarch) (BOAI-1)

1. Persuade the authors of the annual 2,500,000 articles they publish in the existing toll-access journals to also self-archive them in their institutional open-access archives.

Four reasons for research impact

(shared by researcher and institution but not by researcher and discipline)

1. Contributions to Knowledge
2. Employment, Salary, Promotion, Tenure, Prizes
3. Research Funding, Resourcing
4. Institutional Overheads, Prestige (attracting teachers, students, researchers, industrial collaboration)

Don't conflate the different forms of
institutional archiving:

Only the 5th is relevant here

1. Institutional digital collection management
2. Institutional digital preservation
3. Institutional digital courseware
4. Institutional digital publishing
5. **Institutional self-archiving of refereed research output**

Would-be peer review reformers, please remember:

- The pressing problem is to free peer-reviewed research access and impact from tolls:
- not from peer review!

- If you have a peer-review reform hypothesis,
- please take it elsewhere,
- and test it,
- and then let us all know how it comes out...

- Meanwhile,
- please let us free peer-reviewed research
- such as it is!

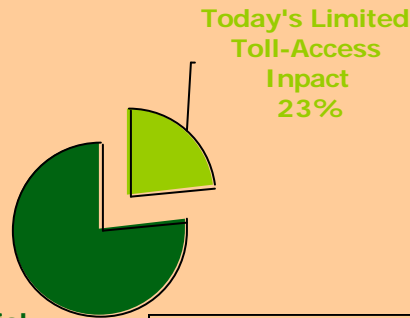

Quo usque tandem patientia nostra...?

How long will we go on letting our cumulative daily/monthly/yearly research-impact losses grow,

now that the online medium has made it all preventable?

What we stand to gain:

.91 correlation with UK research ranking and funding

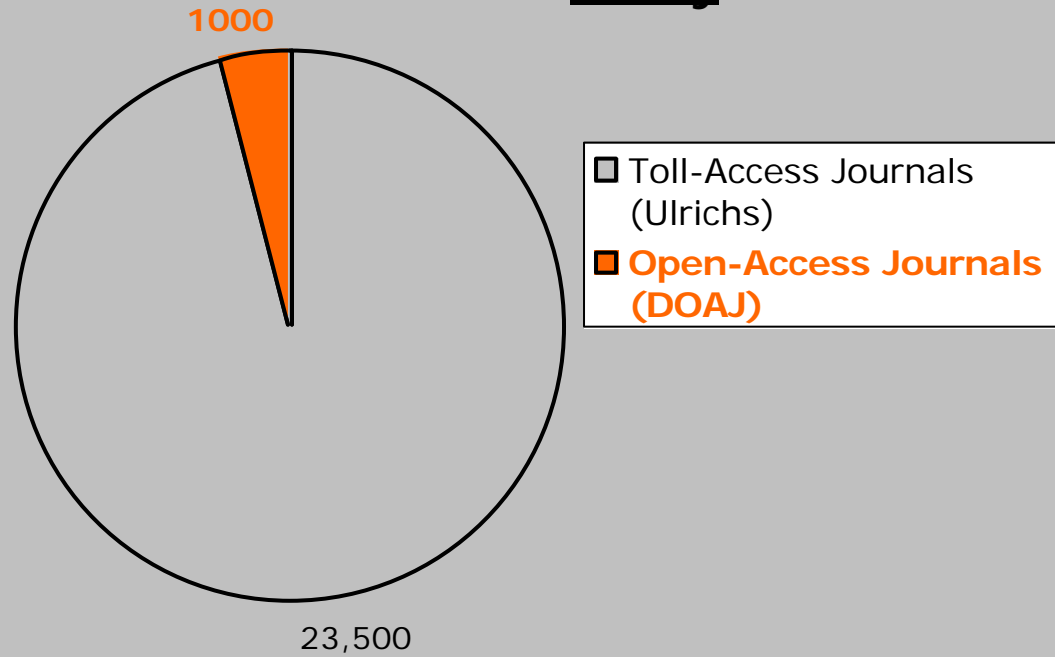

Lost Potential Open-Access Impact
77%

Yearly/Monthly/Daily Impact Loss

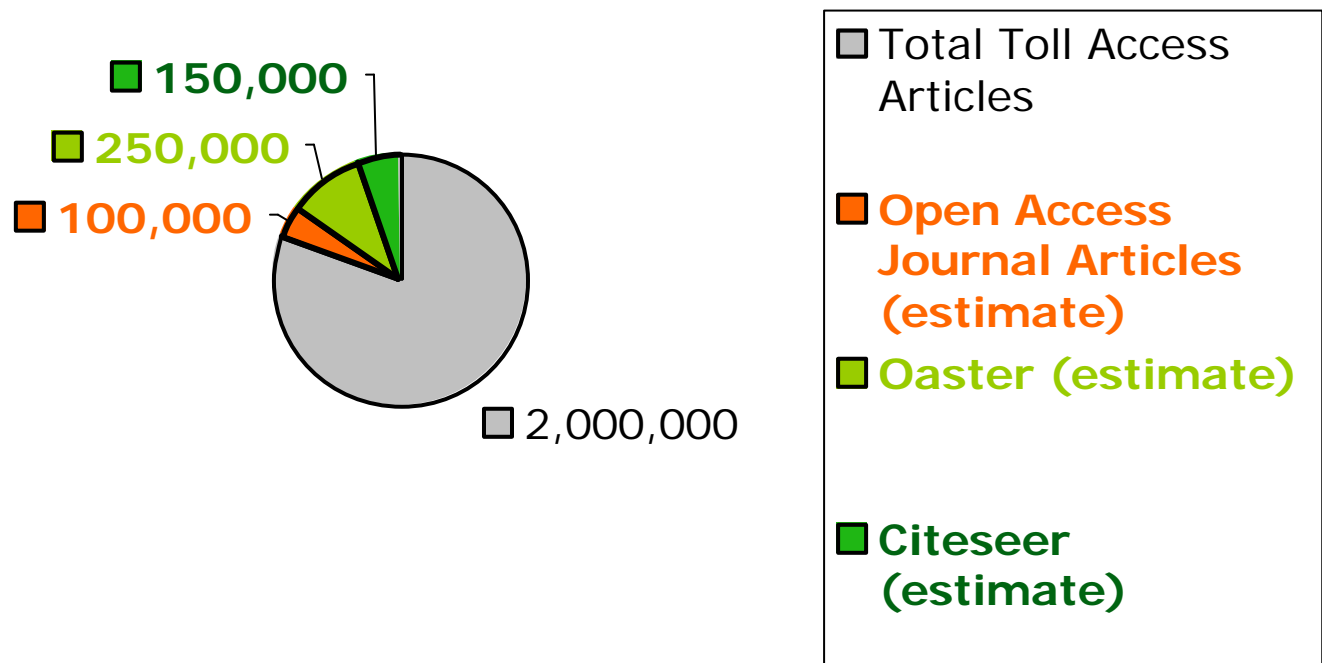

336% higher impact

Proportion of Toll-Access and **Open-Access** *Journals* Today

Proportion of Toll-Access and **Open-Access** Articles Today

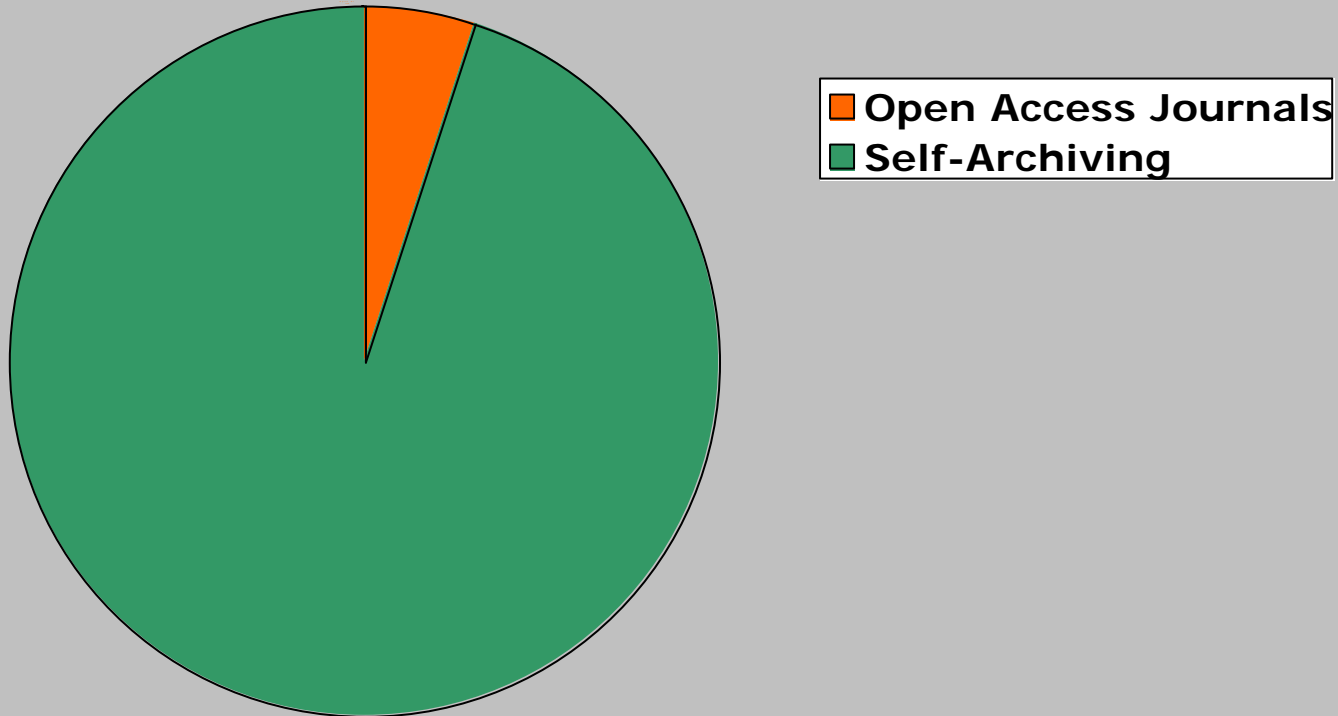

Romeo "Green/Gold" versus "Gray" Journals

- Journals already supporting self-archiving (gold)
- Journals already supporting self-archiving (green)
- Journals not yet supporting self-archiving gray)

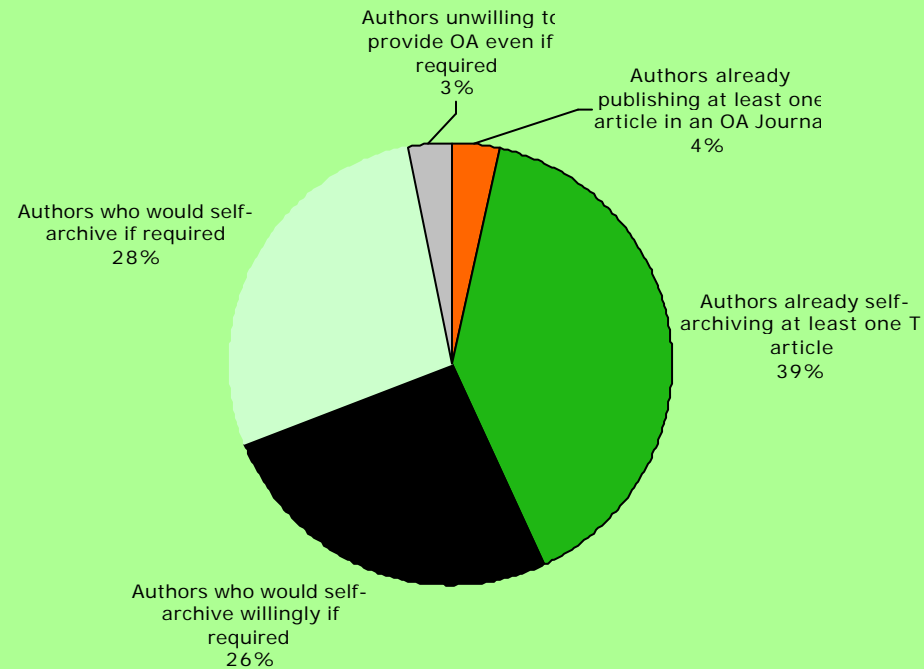

The 100% Solution for providing immediate Open Access Today

Swan & Brown (2004)

39% of authors self-archive
69% would self-archive willingly if required

Actual and potential proportions of Open Access Articles

Tools for

- (a) creating OAI-compliant university **eprint archives**
- (b) parsing and finding cited references on the web,
- (c) reference-linking eprint archives,
- (d) doing scientometric analyses of research impact,
- (e) creating OAI-compliant **open-access journals**
